 Pune |  +91 9766228503 |  [maheshmorde2511@gmail.com](mailto:maheshmorde2511@gmail.com)

## SKILLS

**BACK END DEVELOPMENT** | Python • Django • Java • Spring  
**DATA PIPELINES** | Amazon S3 • Amazon Redshift  
**MISCELLANEOUS** | Amazon AWS • MySQL • MongoDB • Web Development • Git • Docker  
**BACK END DEVELOPMENT** | AngularJS • JavaScript • Bootstrap  
• HTML • CSS  
**SOFT SKILLS** | Team Player • Bias for action • Deliver result

## PROJECTS

### NoteBUDDY – just create and publish

- Developed a knowledge-sharing platform where users can write, store, and publish notes. They can also provide feedback on others' notes.
- Used the Django framework for the backend, secured user authentication. Functionalities like note creation, editing, publishing and Razorpay for contribution. Used Bootstrap, HTML, and CSS.
- Improve individual productivity and helps to community of learners who can learn from and support each other.

### Inventory Management System – E Commerce

- Developed a car showroom management system using Java, Swing, and MySQL.
- Used Java, Swing, and MySQL: Built a user-friendly interface with CRUD operations for data management.
- Improves efficiency and data accuracy: Streamlines operations, automates data management, and validates information.

### Connectify – A Contact Manager

- Built a contact management app: Connectify allows centralized storage and remote access of your contacts.
- Used Django and SQLite: Built with a user-friendly interface and secure database for efficient CRUD operations.
- Improves accessibility and organization: Connectify allows easy management and access to your contacts from anywhere.

### Spotify Clone: Stream Music with Style (Frontend)

- Built the frontend for a music streaming platform mimicking Spotify.
- Used Angular and Bootstrap for a dynamic and scalable user interface also implemented user authentication.

### Weather App: Quick and Easy Weather Access

- Developed a weather application that shows real-time data like temperature, humidity, wind speed, and real feel for any city.
- Utilized Rapid API to access real-time weather information built interface using HTML, CSS, and JavaScript.
- This application allows users to access accurate and up-to-date weather information conveniently with a user-friendly and customizable interface.

## EDUCATION

**YASHWANTRAO CHAVAN  
MAHARASHTRA OPEN  
UNIVERSITY**

M.B.A., Finance

Apr 2023 | Pune – India | CGPA: 8.73/10

**SAVITRIBAI PHULE PUNE  
UNIVERSITY**

B.E., Instrumentation Engineering

Jan 2022 | Pune – India | CGPA: 7.84/10

## HONORS & AWARDS

**2<sup>nd</sup> RUNNE UP - GitHub Copilot**

**Hackathon** | All India Rank 3 in "GitHub Copilot Hackathon" hosted by Microsoft Corporation on the esteemed TechGig Code Gladiators platform (July 2023).
