

MAHESH MORDE (Software Engineer)

Manchar, Pune, Maharashtra | [+91 97 66 228 503](tel:+919766228503) | maheshmorde2511@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Web Developer experienced in building scalable, user-centric web applications for social-impact and enterprise clients. Skilled in designing responsive interfaces, developing modular architectures, integrating APIs, and implementing secure role-based systems. Known for delivering reliable features, improving workflows, and collaborating effectively across teams to enhance user experience and application performance.

EDUCATION

1. Java Full Stack Development Certification

IT Vedant Institute, Pune, Maharashtra

2022 - 2023

2. Bachelor of Engineering

Savitribai Phule Pune University.

2018 – 2021

Government College of Engineering and Research, Avasari Khurd

ACHIEVEMENTS

1. 2nd Runner Up – Microsoft GitHub Copilot Hackathon

All India Rank 3 in "GitHub Copilot Hackathon" hosted by Microsoft Corporation on TechGig Code Gladiators platform

2. 1st Runner Up - IT Vedant Training Institute

All India Rank 2 in "Interbranch Competition" organized by IT Vedant Training Institute

WORK EXPERIENCE

1. Software Engineer

Platform Commons Foundation - Remote

04/2024 – Present

Projects – VMS(Vendor Management System), Markify (Agri products related web Application).

Clients – SBI Foundation, Lupin, Misfyt, Gandhi Fellowship, Make a Difference, Magasool

As a Software Engineer, I have contributed to designing and developing scalable web applications for social-impact organizations and enterprise clients. I've worked on creating user-centric features, improving workflows, and building secure, multi-role platforms with strong focus on usability, performance, and maintainability. My work includes delivering end-to-end modules, integrating APIs, and collaborating closely with cross-functional teams to build reliable digital solutions.

Responsibilities:

1. Delivered responsive and scalable web applications for social-impact and enterprise clients.
2. Developed profile management modules with update workflows and data validations.
3. Implemented structured, modular architecture to improve code maintainability and performance.
4. Integrated APIs to streamline data flow and system functionality.
5. Built secure role-based access for multi-level user operations (user/admin/super-admin).
6. Contributed to multi-tenant platforms for diverse client requirements.
7. Improved usability by designing intuitive interfaces and consistent UI/UX patterns.
8. Delivered customized solutions for clients like Misfyt, Gandhi Fellowship, SBI Foundation, and Lupin.
9. Collaborated with cross-functional teams to ensure stable, high-quality feature delivery.

2. Catalog Associate

Amazon Development Centre India Pvt. Ltd, Remote

09/2021 - 01/2025 (3yrs 5 months)

Project – Catalog Quality Improvement System (CQIS), Competitor Pricing Analysis Framework (CPAF)

As a Catalog Associate at Amazon, I supported large-scale catalog operations through data analysis, process optimization, and quality assurance. I worked on improving catalog accuracy, resolving listing issues, and ensuring smooth workflows across teams while contributing to better customer experience and operational efficiency.

Responsibilities:

1. Analyzed competitor pricing and market trends to support pricing strategy decisions.
2. Performed data extraction, validation, and reporting to improve catalog accuracy.
3. Identified listing issues and implemented corrective actions to maintain catalog quality.
4. Coordinated with cross-regional teams to resolve catalog and operational discrepancies.
5. Led and mentored a team through audits, workflow improvements, and daily processes.
6. Supported automation initiatives to reduce manual workload and improve efficiency.

CERTIFICATIONS

Angular Fundamentals – Certificate from IT Vedant Institute

Full Stack Development – Certificate from IT Vedant Institute

Crash Course on Python - Certificate from IBM on Coursera

Java Fundamentals – Certificate from IT Vedant Institute

SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Responsive UI, Component-Based Architecture

Web Development: Modular Design, Profiling & Optimization, Form Handling, API Integration

Backend: Python, Django, SQL, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS (S3), Docker, Git, GitHub, CI/CD

Others: Agile, Debugging, Automation, Data Validation
