

MAHESH MORDE (Software Engineer | Software Developer)

Pune, Maharashtra | [+91 9766228503](tel:+919766228503) | maheshmorde2511@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer with 4 years of experience building scalable, responsive web applications using **Angular, TypeScript, and REST APIs**. Strong expertise in **component-based architecture, API integration, and performance optimization**. Proven ability to deliver enterprise-grade solutions in **multi-tenant environments** and improve operational efficiency through automation and clean UI/UX design.

SKILLS

- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, RxJS, NgRx, Angular CLI.
- **Backend:** Python, Django, REST APIs.
- **AI Tools:** GitHub Co-pilot, Google Antigravity, Cloud-AI, ChatGpt, Cursor, Augment Code, Amazon Q and Kiro.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **Cloud & DevOps:** AWS (S3, EC2, Lambda, SQS), Docker, CI/CD Pipelines.
- **Tools & Practices:** Git, GitHub, Bitbucket, GitLab, Agile, Debugging, Code Review.
- **Core Concepts:** Component-Based Architecture, SPA, Reactive Forms, Dependency Injection, Lazy Loading.
- **Practices:** Agile/Scrum, Cross functional collaboration, stakeholder management.

CERTIFICATIONS

1. **Angular Fundamentals** – Certificate from IT Vedant Institute
2. **Full Stack Development** – Certificate from IT Vedant Institute
3. **Crash Course on Python** - Certificate from IBM on Coursera
4. **Java Fundamentals** – Certificate from IT Vedant Institute

WORK EXPERIENCE

1. Software Engineer

Platform Commons Foundation – Remote

04/2024 – 3/2026

Projects

- VMS (Vendor Management System) is a multi-tenant web platform used by social-impact organizations to manage vendors, users, and role-based operations across multiple clients.
- Markify is an agri-trading platform that enables farmers, FPOs, and warehouses to list, manage, and trade agricultural products for enterprise and NGO partners.

Clients

SBI Foundation, Lupin, Misfyt, Gandhi Fellowship, Make a Difference, Magasool, Seniors In Seva

Responsibilities:

- Developed and maintained scalable Angular-based web applications using component-driven architecture, improving code reusability and maintainability.
- Designed and implemented multi-tenant architecture with role-based access control (RBAC) to support diverse client requirements.
- Built dynamic, responsive UI components using Angular, TypeScript, and Bootstrap to enhance user experience and accessibility.
- Integrated RESTful APIs for real-time data synchronization and seamless backend communication.
- Engineered form workflows with validations and reactive forms, ensuring data accuracy and improved user input handling.
- Optimized application performance through modular design, lazy loading, and efficient state handling (RxJS).

- Delivered customized feature enhancements based on client-specific requirements across multiple projects.
- Collaborated with cross-functional teams (product, backend, QA) to ensure high-quality, on-time feature delivery.
- Contributed to UI/UX standardization, improving consistency and usability across platforms.

Key-Achievements:

- Retained a high-risk client (Seniors in Seva) by delivering fully customized product enhancements within 1 week, converting a potential churn into continued partnership.
- Accelerated feature delivery timelines by implementing modular and reusable components, reducing development effort for new features.
- Enhanced platform security and access control by implementing robust role-based workflows across multi-level users (Admin/User/Super Admin).
- Improved user experience and adoption by redesigning UI components and ensuring consistent design patterns across applications.
- Delivered successful client-specific solutions for organizations like SBI Foundation, Lupin, and Gandhi Fellowship, strengthening long-term engagement.
- Enabled scalable multi-tenant support, allowing seamless onboarding of multiple clients on a single platform.

2. Catalog Associate

Amazon Development Centre India Pvt. Ltd, Remote

09/2021 - 03/2024 (2 yrs 5 months)

Responsibilities:

- Developed and maintained Angular-based internal applications for high-volume vendor order processing and catalog management.
- Built modular, data-driven UI components and workflows, improving operational efficiency by 30%.
- Integrated RESTful APIs to enable real-time synchronization with Amazon's global catalog systems.
- Automated data extraction and validation processes for competitor pricing analysis (CPAF), reducing manual effort.
- Designed role-based dashboards to provide insights into catalog quality and pricing metrics.
- Led technical audits and mentored team members, ensuring data accuracy and process standardization.
- Collaborated with cross-functional teams to resolve system bottlenecks and improve application stability.

ACHIEVEMENTS

1. **2nd Runner Up [Microsoft GitHub Copilot Hackathon \(ALL INDIA RANK\)](#)**
All India Rank 3 in "GitHub Copilot Hackathon" hosted by Microsoft on TechGig Code Gladiators platform
2. **1st Runner Up - IT Vedant Training Institute**
All India Rank 2 in "Interbranch Competition" organized by IT Vedant Training Institute

EDUCATION

1. **MBA (Finance)**
Yashwantrao Chavan Maharashtra Open University 2021 – 2023
2. **Java Full Stack Development Certification**
IT Vedant Institute, Pune, Maharashtra 2022 - 2023
3. **Bachelor of Engineering (Savitribai Phule Pune University)**
Government College of Engineering and Research, Avasari Khurd 2017 – 2022
