

MAHESH MORDE (Software Engineer | Software Developer)

Pune, Maharashtra | [+91 9766228503](tel:+919766228503) | maheshmorde2511@gmail.com | linkedin.com/in/mahesh-morde | mahesh-morde.github.io/Resume

SUMMARY

Software Engineer with 4.9 years of experience developing scalable web applications using **Angular, TypeScript, and REST APIs**, with strong experience in AI-assisted development using tools like **Claude, GitHub Copilot, ChatGPT, Antigravity, and Cloud AI**. Experienced in building **component-based architectures, integrating APIs, and using AI tools** to accelerate development, automate repetitive coding tasks, debug issues, and improve overall code quality and productivity. Comfortable working in Agile environments and collaborating with cross-functional teams to deliver high-quality software solutions.

SKILLS

- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, RxJS, NgRx
- **Backend:** Python, Django, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud & DevOps:** AWS (S3, EC2, Lambda, SQS), Docker, CI/CD Pipelines
- **Development Tool:** Git, GitHub, Bitbucket, GitLab, Agile, Debugging, Code Review
- **AI-Assisted Development Tools:** GitHub Copilot, Claude, ChatGPT, Antigravity, Cloud AI, Cursor, Augment Code, Amazon Q
- **AI Usage:** Code generation, debugging, refactoring, API integration, unit test generation, SQL query generation, documentation, performance optimization
- **Core Concepts:** Component-Based Architecture, SPA, Reactive Forms, Dependency Injection, Lazy Loading.
- **Practices:** Agile/Scrum, Cross functional collaboration, stakeholder management.

CERTIFICATIONS

1. **Angular Fundamentals** – Certificate from IT Vedant Institute
2. **Full Stack Development** – Certificate from IT Vedant Institute
3. **Crash Course on Python** - Certificate from IBM on Coursera
4. **Java Fundamentals** – Certificate from IT Vedant Institute

WORK EXPERIENCE

1. Software Engineer | Platform Commons Services.

Remote | 02/2025 – 07/2026

Projects

- VMS (Vendor Management System) is a multi-tenant web platform used by social-impact organizations to manage vendors, users, and role-based operations across multiple clients.
- PSA Manthan is a Government of India project for NITI Aayog, built as a micro-frontend application to support modular, scalable development.

Clients

- Government of India, NITI Aayog, SBI Foundation, Misfyt, Gandhi Fellowship, Make a Difference, Magasool, and Seniors In Seva

Responsibilities:

- Developed modular Angular micro-frontends for PSA Manthan, enabling independent development and deployment of application features.
- Independently built reusable UI component libraries to provide a consistent interface across micro-frontends.
- Developed shared libraries for analytics and assessments, improving reuse of common business functionality.

- Developed and maintained scalable Angular-based applications using component-driven architecture, improving code reusability and maintainability.
- Designed and implemented multi-tenant architecture with role-based access control (RBAC) to support diverse client requirements.
- Built responsive, data-driven UI components using Angular, TypeScript, and Bootstrap; integrated REST APIs for reliable data exchange.
- Engineered form workflows with validations and reactive forms, ensuring data accuracy and improved user input handling.
- Optimized application performance through modular design, lazy loading, and efficient state handling (RxJS).
- Delivered customized feature enhancements and collaborated with product, backend, and QA teams to deliver high-quality features.
- Contributed to UI/UX standardization, improving consistency and usability across platforms.

Key Achievements:

- Created independently maintained shared UI, analytics, and assessment libraries for the micro-frontend ecosystem.
- Improved application consistency and development efficiency through reusable components and shared functionality.
- Retained a high-risk client (Seniors in Seva) by delivering fully customized product enhancements within 1 week, converting a potential churn into continued partnership.
- Accelerated feature delivery timelines by implementing modular and reusable components, reducing development effort for new features.
- Enhanced platform security and access control by implementing robust role-based workflows across multi-level users (Admin/User/Super Admin).
- Improved user experience and adoption by redesigning UI components and ensuring consistent design patterns across applications.
- Delivered successful client-specific solutions for organizations like SBI Foundation and Gandhi Fellowship, strengthening long-term engagement.
- Enabled scalable multi-tenant support, allowing seamless onboarding of multiple clients on a single platform.

2. Software Developer Intern (Part-time) | Platform Commons Services

Remote | 04/2024 – 01/2025

Project

- Markify is an agri-trading platform that enables farmers, FPOs, and warehouses to list, manage, and trade agricultural products for enterprise partners.

Clients

- Vritti and Lupin

Responsibilities:

- Developed Angular-based UI components and workflows for the Markify platform.
- Built responsive interfaces using Angular, TypeScript, and Bootstrap.
- Integrated REST APIs to support data-driven application features.
- Collaborated with the development team to deliver client-specific requirements.

3. Associate Catalog EN (RBS | CMT) | Amazon Development Centre India Pvt. Ltd

Remote | 09/2021 – 01/2025 (3 yrs 5 months)

Responsibilities:

- Developed and maintained Angular-based internal applications for high-volume vendor order processing and catalog management.
- Built modular, data-driven UI components and workflows, improving operational efficiency by 30%.
- Integrated RESTful APIs to enable real-time synchronization with Amazon's global catalog systems.
- Automated data extraction and validation processes for competitor pricing analysis (CPAF), reducing manual effort.

- Designed role-based dashboards to provide insights into catalog quality and pricing metrics.
- Led technical audits and mentored team members, ensuring data accuracy and process standardization.
- Collaborated with cross-functional teams to resolve system bottlenecks and improve application stability.

ACHIEVEMENTS

1. **1st Runner Up [ET AutoTech Hackathon 2026](#) | [LinkedIn](#)**
South Asia's biggest AutoTech event
ETAuto Hackathon 2026 was a large-scale innovation challenge focused on solving real-world problems in the automotive, software and manufacturing ecosystem using Artificial Intelligence (AI), data, and emerging technologies.
2. **2nd Runner Up [Microsoft GitHub Copilot Hackathon \(ALL INDIA RANK\)](#)**
All India Rank 3 in "GitHub Copilot Hackathon" hosted by Microsoft on TechGig Code Gladiators platform
3. **1st Runner Up - IT Vedant Training Institute**
All India Rank 2 in "Interbranch Competition" organized by IT Vedant Training Institute

AI-ASSISTED DEVELOPMENT WORKFLOW

- Use AI tools like Claude, Copilot, Antigravity, and Cloud AI for code generation and feature scaffolding.
- Use AI for debugging errors and identifying root causes.
- Use AI for refactoring code into reusable and optimized components.
- Use AI for writing SQL queries, API integration code, and documentation.
- Use AI as a pair programmer to improve development speed and code quality.

EDUCATION

- | | |
|---|-------------|
| 1. MBA (Finance) – Yashwantrao Chavan Maharashtra Open University
Distance Education | 2021 – 2023 |
| 2. Bachelor of Engineering – Savitribai Phule Pune University
Full-Time Government College Of Engineering Awasari | 2017 – 2021 |
